MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Representatives for the Defense Occupational and Environmental Health Readiness System (DOEHRS) Build 2

1. Request each DoD Component formally identify two to four industrial hygiene subject matter experts to participate in the development and review of the Presentation Layer/Graphical User Interface for the DOEHRS Build 2. Representatives should have extensive installation/base level experience serving as an Industrial Hygienist or Industrial Hygiene Technician.
2. Request formal identification of one to two environmental health/environmental surveillance subject matter experts from each Service to participate in the development and review of the Presentation Layer/Graphical User Interface for the DOEHRS Build 2. Representatives should have extensive knowledge of environmental health surveillance in a deployed environment. The DOEHRS Build 2 application will address a significant portion of the deployment occupational and environmental health functionality for integration into the Theater Medical Information Program (TMIP) Block 2.
3. The proposed schedule calls for four 3-day meetings in the National Capital Region. It is critical that the same individuals identified be available for at least three of the meetings. Travel days are scheduled for Monday and Friday. Meeting days are a full three days: Tuesday-Thursday. The proposed meeting weeks are as follows:

5 June
24 July
21 August
18 September
4. Funding for travel is available for 3 representatives per Service (Army, Navy Air Force). Unfortunately, funding is not available for the Defense Agencies (e.g. DLA, NSA, COE). Fund cites are normally sent out two weeks prior to travel.
5. There is a time commitment of approximately 3 days in the month prior to each meeting. It is critical that identified individuals are aware of the time commitment and responsibilities to insure productive and successful work group meetings.

Readiness thru Health

MCHB-TS-OOD

SUBJECT: Representatives for the Defense Occupational and Environmental Health Readiness System (DOEHRS) Build 2

6. The outcomes of these meetings are a workflow oriented presentation layer and technical specification documents for the identified requirements in the DOEHRS Software Requirements Specification document and the DoD Health Affairs Dynamic Object Oriented Requirements System. All technical specification documents that address specialized functional areas such as ergonomics, ionizing radiation, radio frequency radiation, or laser radiation will be presented to the appropriate Chartered DoD working group for review, comment, and approval.

FOR THE COMMANDER:

WILLIAM H. MONK
Project Manager, DOEHRS
